NATIONAL SEMINAR

Poster Presentation : Each presentation will be displayed as a SINGLE POSTER on a 90 cm x 120 cm (portrait) poster board.

Poster Presentation Tips

- Don't crowd too much information into the presentation; concentrate on two or three main points. Highlight your title, headings, and subheadings with colours or coloured lines. Make sure your poster information (text, figures, table, photos) is clearly visible from a distance of 2 m from the poster so it can be easily read from this distance.
- Format headings and subheadings should be at least 25% larger than the text copy in bold or semi bold. " Keep your text in short, concise, legible statements; minimize complete sentences and paragraphs. Remember that photos and graphs convey information more readily than text and tables.
- Text in upper and lower case letters is more readable than in all capitals. Use Arial or Times New Roman font style.
